efficient hotel management system

Comfort...

When it comes to the hospitality industry it's the buzzword; comfort is certainly the most sought after obsession for both the guest and host. Hotsoft, the latest innovation in customized hotel software packages, facilitates comfort at all levels of hotel management and thereby total comfort for the guest. Hotsoft is empowered with easy methods and modules to manage the diverse functions of the hospitality industry.

In a competitive customer centered environment, running a hotel or resort needs a proper infrastructure backing and impeccable processes. An integrated and effective hotel management system right on purpose helps timely implementation of services and facilities.

Hotsoft is a fully integrated suite of products consisting of modules that can be easily added or expanded allowing effective and easy management from smaller operations to global, multi branded network of hotels and resorts. It can be deployed in any size environment, from a single property with just a front office to a large, full fledged hotel with various departments like sales & marketing, catering, revenue management, quality management, back office and materials management. In addition, Hotsoft offers products for a hotel chain's corporate office, including Central Reservations Systems for both centralized guestroom and function space sales, Enterprise Information System and the Customer Relationship Management (CRM) package specifically designed for the hospitality industry.

Competence...

Hotsoft provides it; competence. Several reputed names in the industry, from star deluxe to medium hotels have already adopted Hotsoft to improve efficiency and ease management affairs. On the technical side, Hotsoft is a GUI based and WEB enabled Hotel Business Management Solution, developed with Oracle (Standard/Enterprise editions) as its database and Windows/Linux as operating systems, to provide efficient, reliable and secure data base management. To make it more user-friendly, the system is being divided into various modules. Each module gives detailed reports of various activities.
